

Access to Learning Materials

KEY FEATURES OF THE SCILS/EILS WEBSITE

- Personal Development Plan
- Individual Learning Sessions
- Group Learning Sessions
- News Desk
- Discussions Board

"It helped me get a good start with my Management Qualification."

"It has been very useful to get the Mental Capacity Act online, it's the best way for many care staff to access it."

"A comprehensive one stop shop for a wide variety of information and materials related to the care sector."

A Subscription has been taken out by Croydon Council.

This enables all Statutory Sector and many PVI Sector organisations access to the Learning Materials and Facilities provided on the www.scils.co.uk and www.eils.co.uk websites.

Access Information

Contact your immediate line manager, or Elizabeth Uwadiae on elizabeth.uwadiae@croydon.gov.uk for access information.

You will be issued with a registration number. To access the website you need to go to www.scils.co.uk and click on Register. Use the registration number you are given to create a username and password for logging in.

A User Guide is available by clicking on the link at the bottom of the website which gives step by step instructions on registering with the website.

To contact SCILS/EILS with any query use the following details:

Email: info@scils.co.uk

Web: <http://www.scils.co.uk>
<http://www.eils.co.uk>

Post: 136 Repton Road, West Bridgford
Nottingham, NG2 7EL

Phone: 0115 923 0200

What is on the SCILS/EILS websites?

Individual Learning Sessions: Learning materials (up to an hour and a half in length) covering a variety of topics for employees at all levels in the organisation with a defined set of objectives and links to qualifications.

Multiple Choice Tests: Use the website to create bespoke multiple choice tests for your members of staff and record evidence of completion/pass rates.

Group Learning Sessions: High quality group/taught learning sessions designed for managers or those with teaching responsibilities to download and run with their employees. Some will be appropriate for an hour and a half session at the end of a staff meeting; others are designed to last longer. All come with handouts ready for photocopying, step by step guidance about running the session and clear learning objectives.

Care Certificate Resources: Comprehensive learning programmes covering the Care Certificate, enabling those with managerial/training responsibility to download and run with staff.

Personal Development Plan: A facility enabling learners to record the completion of Learning Sessions or Units relating to Social Care Qualifications. The learner or manager can select Learning Sessions, Units or their own organisational resources (e.g. policies) for the learner to complete and view the completion record.

Manager's Induction Standards: Each of the Standards are individual learning sessions and each has an on-line or downloadable evidence booklet for completion. The Standards are aimed at staff new to management as well as those new in post who have previously managed other care services. They are also intended for aspiring or potential managers to help support their development, although evidence of having met some of the standards will require actual management experience.

News Desk: Key issues/documents relating to policy, legislation, research etc, are identified weekly from over 60 other websites, for example, the Department of Health/Education, Care Quality Commission, Skills for Care etc. A summary of the new information is provided along with a link to the source of the information.

Discussions Board: A forum for registered users to ask questions or start discussions with other members of the website throughout the country.

Question and Answer facility: A facility for staff to ask questions with an answer guaranteed within 48 working hours.

Comments from People using the Website

I use the website at least weekly: it's been incredibly helpful for signposting and keeping up to date with quick summaries that can be looked at in more depth if necessary. It's also really helpful for getting ideas for support groups (particularly for keeping up to date re consultation). I've also used some of the research in training groups. Thank you! The site saves me loads of time having to research individual topics.

I have used the Scils resources over the last few years in various situations and have found it an invaluable resource. I work within local authority provision, but train with statutory and voluntary organisations. Resources have been used both directly and as contents within training material. Staff have been able to use them directly to support their training especially within the NVQ. Scils regular emails and links enable practioners to keep up to date - the easy of access and presentation of the material support learning. I have found it an all round positive support in working to best safe practice within care.

The scils website and newspapers are an extremely useful resource. I have used the training materials to advance my own knowledge and to augment other business objectives of our care company. In particular I have been able to advise our home managers to use the training tools for dementia awareness to improve staff knowledge for the homes where dementia is prevalent, but not necessarily diagnosed/registered. It has enabled the staff to have a better understanding of the disease and its effects on behaviour of our residents and therefore how to care for each person individually and with the utmost respect, dignity and care. The news emails are highly informative and keeps me updated on current thinking, topics under review etc

I am an HR Officer for a small private care company with about 20 staff and am involved in inducting new colleagues. I use SCILS to find learning sessions that will help support those with not much experience or who have been out of the care industry for a while. I find the variety of learning sessions available is very good and they cover a broad range of topics. I also use the sessions to help colleagues improve their understanding and knowledge. I also find the fact that the sessions can either be worked on online or on paper is very useful. I would highly recommend this website to anyone in the care industry.

Learning Sessions for people working with adults
