

The NHS COVID-19 app works in reducing coronavirus cases

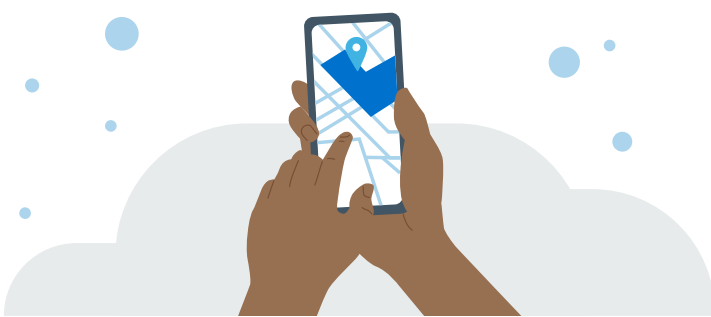

Download and use today

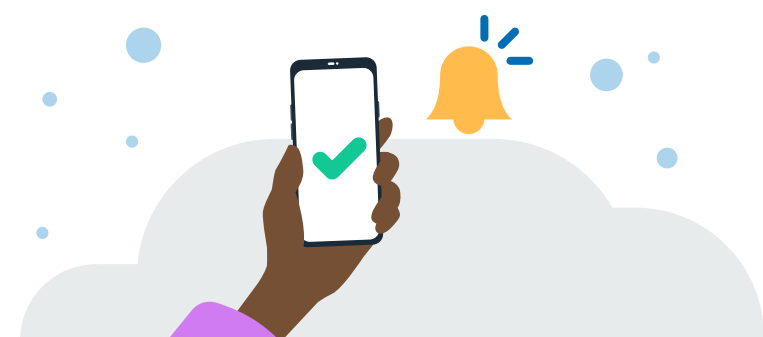

The app has been downloaded over 21 million times since launch, representing 56% of the eligible population*.

Effective at breaking chains of transmission, preventing 600,000 cases since it launched in September 2020.

For every 1% increase in app users, the number of coronavirus cases in the population can be reduced by 2.3%.

The app sends an isolation alert to users as quickly as 15 minutes after a detected close contact enters a positive test result. The fastest way to be notified.

Thank you to everyone who has already downloaded the app. Make sure you have the latest version. If you haven't downloaded please do so via the App Store or Google Play Store on your phone.
