

Infection control in your care setting this winter

Autumn's here, which makes it more likely that your care setting will start to be challenged by the impact of **cold and flu season** - as well **COVID-19** - over the upcoming weeks.

Managing the risk of infection not only keeps your people and service users safe, but also keeps your business ready for any upcoming inspections. So, it's important that you're keeping on top of your Health & Safety measures that limit the spread of infection.

The care team from Citation, have created an [exclusive guide](#) outlining what your legal responsibilities are - including a checklist of the key questions care providers are asked when their facilities are being inspected - to help you get inspection ready.

[DOWNLOAD YOUR FREE GUIDE](#)

The above guide looks at important areas such as the use of sharps, food hygiene, welfare training, personal protective clothing and equipment, workplace health, safety and welfare.

Available support for LCAS members

From infection control, risk assessments and visiting arrangements to recruitment and retention, staff training, mental health and wellbeing, professional bereavement and tricky HR issues, [Citation](#) can help you operate both safely and compliantly in the coming weeks and months.

They can also help with fire and electrical safety, Care Policies & Procedures, Care Mock Inspections, and [CQC Pro](#) – an application to demonstrate you're meeting CQC requirements.
